Any color shown on this card can be custom matched into opaque, translucent, pearlescent, or transparent in quarts or gallons only. A Color Kit is available with 2 oz. sample jars of actual epoxy, as shown on this card, with hardener and instructions for use. **CAUTION:** Colors on this card may change over time due to uncontrollable fading and aging of pigments. Slight color variations may exist between this representation and actual application due to variations in hardeners used and substrates applied to. We recommend our complete product system, including hardeners, formulated by us to give you optimum results.

The above colors are available in 501 and 1000 Resin series.
